

EECS 1012 Project: Mini-Database (images)

Group Name: “X”

Phase 0:

Description:

We start off by showing a list of design brands (Chanel, Gucci, Balenciaga, Givenchy, Prada, Burberry, etc...). When the user inputs a certain brands' name, some categories pop-up. These categories of different gender such as women, men, kids. Each category will display different clothes items (tops, shirts, jackets, and coats, sweaters, pants, jeans, footwear, beachwear, accessories, dresses, shoes, hoodies, nightwear, socks & tights, sportswear, swimwear & Beachwear, Maternity Wear, Plus sizes, Premium Selection, beauty, care production). So, when the user inputs one of the mentioned categories, an image will be shown according to what they put in earlier.

Phase 1:

Requirements Definition:

- We are creating this website for people who need to shop from more than one place at the same time.
- To help people who need to shop from more than one place at the same time conveniently.
